Quick & Easy Installation *No Special Tools Required*

Directions:

NOTE: Glass window is held in position by frames only! Exercise caution during the dismantling process. Avoid sharp edges on glass.

1. Remove the 12 screws on the interior frame and gently pull frame back, being careful not let the glass fall out. (Only the interior frame needs to be removed.)
2. Gently pry glass from exterior frame. (A putty knife may be used to release glass from exterior frame.)
3. Apply a light bead of silicone sealant around the interior perimeter of the exterior frame where glass sits on frame and mount entrance elegance glass to frame, with textured pattern to the inside of the RV.
4. Position interior frame so that screw holes are aligned. (Silicone sealant is not required).
5. Insert screws and tighten, being careful not to over tighten.
6. Carefully trim away excess putty and or sealant.
